High Precision, Quick-Turnaround Marking For Medical and Dental Manufacturers

Since 1954, Marking Methods has specialized in providing quality marking services. Whatever your application or material, we can offer quick, accurate, cost-effective marking solutions you can depend on job after job.

Our services include:

- Permanent, high-precision laser marking of metals, plastics, and glass
- Permanent, controlled-depth electro-chemical marking of conductive metals like aluminum, stainless steel, carbide, etc.
- Hot stamping and pad printing of plastic, ceramic and elastomeric products in bright, bold colors or vivid foils

Whatever your needs, we can mark your parts with crisp bar codes, logos, part or serial numbers or detailed graphics.

Let us prove it to you today. Send us the parts you want marked and we will mark them for you free and provide you with a quick, no-obligation estimate.

Or call (626) 282-8823 to discuss your applications in detail.
